PROFESSIONAL SUMMARY

Full Stack Software Engineer and frontend developer with extensive experience building web platforms, AI-powered applications, integrations, and internal business systems. Strong hands-on expertise in HTML5, CSS3, JavaScript, React, Next.js, TypeScript, Supabase, PostgreSQL, Cloudflare Workers, REST APIs, RAG architectures, vector databases, and modern SEO-focused web development. Experienced in translating business requirements into technical specifications, coordinating development and QA, testing releases, and managing complex digital projects. Additional experience in information security, GDPR compliance, DPO responsibilities, technical documentation, and IT education.

CORE TECHNICAL SKILLS

- **Frontend:** React, Next.js 14+, TypeScript, JavaScript ES6+, Tailwind CSS, HTML5, CSS3, MDX, Vite, React Server Components
- **Backend and Cloud:** Node.js, Cloudflare Workers, Supabase, PostgreSQL, Edge Functions, Authentication, PHP, REST APIs, GraphQL
- **AI and Data:** RAG, Retrieval-Augmented Generation, LLM API integration, vector databases, embeddings, AI agents, semantic search
- **Architecture and DevOps:** Jamstack, server-side rendering, static generation, caching, PWA, decoupled architectures, API integrations, Git, GitHub, Vercel, Cloudflare, Firebase
- **Security and Product:** Information security, GDPR, DPO, technical documentation, technical specifications, Agile/Scrum, QA, release testing

PROFESSIONAL EXPERIENCE

J'INFO TOURS & JinfoCruise | Full Stack Software Engineer & IT Administrator | Dec 2022 – Present

- Architect and develop production web applications and internal digital systems using Next.js, React, TypeScript, Supabase, PostgreSQL, Cloudflare Workers and modern API architectures.
- Built CarmenAI, a custom AI travel assistant using Retrieval-Augmented Generation (RAG), vector search, embeddings and LLM APIs to retrieve and present verified travel information without relying on unverified inventory.
- Led the migration of the JinfoCruise B2C platform from a legacy WordPress architecture to a modern Next.js and Supabase stack, with a focus on performance, SEO and maintainability.
- Integrated third-party B2B cruise APIs (MSC Large API) for pricing and availability, implementing data processing, caching and API integration layers for large datasets.
- Developed internal CRM and lead-management workflows integrating Facebook Lead Ads, webhooks, web forms, databases and automated email processing.
- Developed a Progressive Web App (PWA) for tourists and guides, providing access to itineraries and travel documentation.
- Manage technical troubleshooting, hosting, DNS, integrations, security configuration and vendor coordination across company web properties.

Plecari.com | Creator & Full Stack Developer | Mar 2026 – Present

- Architected a multilingual travel content and affiliate platform using Next.js App Router, React Server Components and modern static rendering techniques.
- Implemented Vite and MDX for type-safe content processing, structured content generation and build-time validation.
- Designed scalable content architecture intended to support thousands of SEO-focused destination, travel and service pages.

TechMinds Academy | Web Developer & Digital Trainer | Jan 2025 – Nov 2025

- Designed and developed digital platforms and educational infrastructure using React, Supabase, PHP and SQL.
- Developed a Teacher Digitalization Platform used by 300+ educators for interactive lessons, digital resources and user management.

- Delivered digital transformation and technology workshops for 300+ teachers, translating technical concepts into practical workflows.

ARKEDO School & Academia Micilor Developeri | Computer Science Teacher | *Feb 2021 – Present*

- Design and deliver programming, computer science and digital technology curricula for primary and middle school students.
- Teach programming and game development using Scratch, MCreator, GDevelop, Blockbench and related tools.
- Develop students' logical thinking, algorithmic problem-solving and practical technology skills.

NetBridge / BitFactor SRL (Okazii.ro) | Project Manager / Information Security Manager / DPO | *Nov 2005 – Jul 2019*

- Managed digital product and feature development for Okazii.ro, a major Romanian e-commerce platform, from requirements definition through implementation and release testing.
- Authored functional and technical specifications, translated business requirements into development tasks, and collaborated with development, design and QA teams in an Agile/Scrum environment.
- Designed and implemented information security and fraud-detection processes and systems supporting the protection of users and transactions.
- Led GDPR compliance implementation, including data protection processes, technical and legal documentation, policies and DPO responsibilities.

EDUCATION & CERTIFICATIONS

- Professional Trainer Certification | Ministry of Labor, Romania | Mar 2024 – Oct 2024
- Front End Web Developer Certification | CodersLab | Jul 2019 – Dec 2019
- Bachelor's Degree in Journalism and Mass Communication | University Hyperion, Bucharest | 2007 – 2010
